

17 November 2025

Dear Parents and Carers,

In 2026, students moving into Year 2 will have the opportunity to participate in our iLearn program. This will mean students bring their privately owned and managed iPad to school to support their learning.

At Narangba State School, we have found that integrating iPads into the curriculum offers several benefits for both students and teachers.

- makes learning more interactive and engaging for students
- allows for personalised learning experiences, tailored to individual students' needs and learning styles
- provides features such as text to speech, voice recognition, and accessibility settings to cater for all students
- is an effective communication tool for teachers, students and parents/caregivers
- students have access to a vast array of educational resources, including ebooks, and education programs and applications
- fosters collaboration and creativity equipping students with necessary 21st century skills

Our core belief is that the iPad must be used intentionally with carefully selected apps. It is not expected that these devices are used all day, nor will they replace the important need for students to learn to read and write using more traditional forms. Similar to all teaching and learning tools in our school, the iPads will be used to enrich learning experiences.

In your information pack you find the:

- Program Charter
- iLearn Student Participate Agreement
- Information about device requirements and purchasing
- iPad set up checklist

All documents and further information can be found on the school website www.narangbass.eq.edu.au under curriculum – bring your own device.

Any enquires can be forwarded to iLearn@narangbass.eq.edu.au.

Yours sincerely

Callie Sparling
Acting Principal
